# BLOCKSTAR II

Bigger, Better and Faster. Blockstar-II is a progression of the Blockstar-I, in the Blockstar series of machines with a bigger pallet size. The BlockStar is specifically designed to help in increasing production throughput resulting in better time-to-market.

This machine is best suited for the production of High strength Concrete Blocks, Paving Blocks, Kerbstones, Slabs and other related products.

## PRODUCTS

Flyash Bricks

Paver Blocks

Hollow Blocks

Grass Pavers

The larger pallet allows for better productivity and yield. Also, various options of Pallet handling systems are offered as per the customers' requirements.

The unique Parijatha DUPLEX HOPPER system helps in the even distribution of the material, which ensures that the product height is consistent and precise.

Material Feed box with Hydraulically operated agitator for uniform material filling which allows for faster production time and consistent quality.

## TECHNICAL SPECIFICATIONS

Max working area  
900 x 720 mm

Production Capacity  
1200-1500 cycles/8 hrs shift

Power Required  
42 HP

## KEY FEATURES

- Duplex Bobbin in feed hopper for consistent product
- Advanced Hydraulic systems for smoother operation and faster cycle times
- Customizable to a variety of automation for post-production handling based on requirements
- Low power consumption to production rate ratio
- Superior vibration system for higher strength and quality in the final product
