

# WETCAST LINE

Parijatha Machinery offers complete lines for the manufacture of Precast Concrete Products using the well-proven Wet Cast manufacturing Technology.

Wet Cast technology has been rapidly improved over the past few years owing to the increasing demand for increased automation by producers.

## PRODUCTS

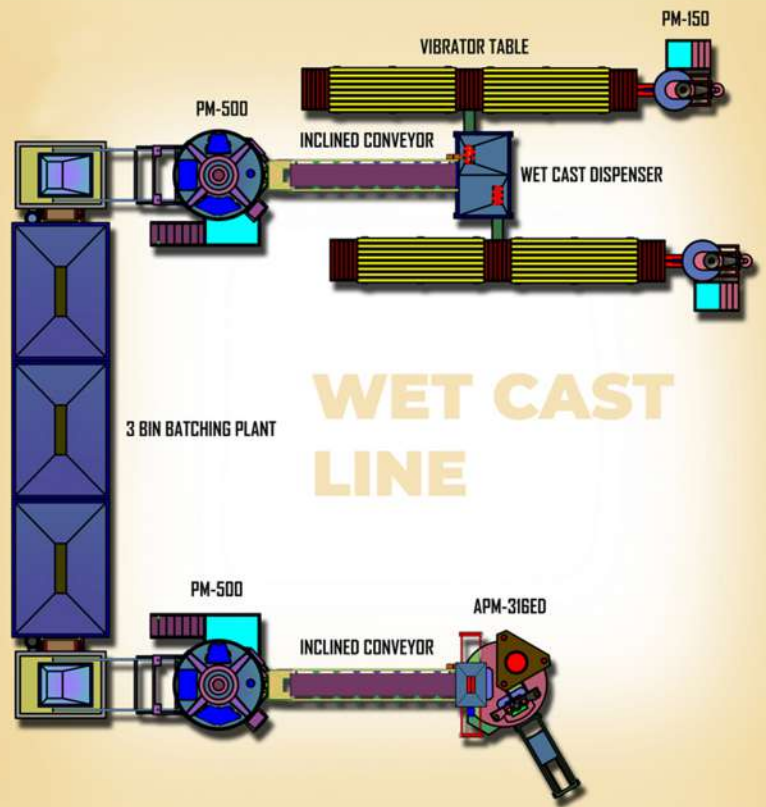

Grass Pavers

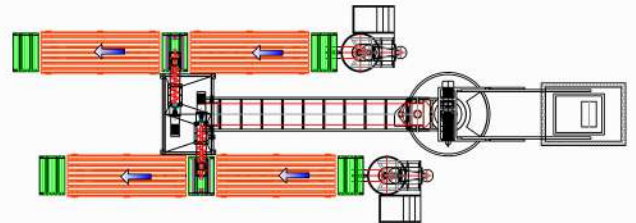

Though the manufacturing process seems simple, there is a need for a systematic line

## THE TYPICAL PLANT CONSISTS OF THE FOLLOWING MACHINES

- Aggregate Batching Plant
- Planetary Mixer with moisture control system
- Mixed material storage hopper
- Integrated high-speed dosing system
- Multi-stage Vibration Table with variable frequency
- Pallet handling system
- Curing and Drying systems
- De-moulding and Surface treatment systems

All these are fully integrated using the latest control systems and automated handling systems to ensure that the highest quality standards and superior finish is achieved, which is the hallmark of the Wet cast product

## KEY FEATURES

- Easily customizable as per customer requirements
- Modular design give room for future expansion plans
- Easy and smooth installation
- Automated operations allows for faster productivity
- Ease of working and reduced labour requirements
